# Welcome to Smile Channel DVD 2009

## ***Getting the Most Out of Smile Channel DVD***

Smile Channel DVD 2009 is a patient education program designed for use in the reception area of the dental practice. It plays in a continuous loop throughout the day, promoting good oral health practices and helping your patients visualize the impact of esthetic dentistry.

The program works as a subtle marketing tool, with more than 100 multimedia presentations that feature high-impact before-and-after images, full-motion video, and 3-D graphics that promote esthetic dentistry and present positive dental messages to your patients. Just insert the Smile Channel disk into your DVD player or computer and walk away. It's that simple.

With this *Smile Channel DVD 2009 User Guide*, you will find the information you need to get the most out of Smile Channel DVD 2009, including—

- Update Savings Plan
- Hardware requirements
- Playing and customizing Smile Channel
- Smile Channel playlist
- Smile Channel categories subcategories, and presentations

## ***Viewing the DVD in Widescreen Format***

The DVD that comes with your annual Smile Channel Update Savings Plan displays presentations in standard (4:3) format. If you have a widescreen television, you may exchange the standard format DVD for the widescreen (16:9) format at no additional cost.

The only difference is that the 16:9 version allows you to take fuller advantage of your widescreen television's capabilities. For example, more of the image may display on the sides of the widescreen DVD.

- For more information about exchanging your standard Smile Channel DVD for a widescreen version, contact Customer Service. See "Contact Us" on page 25.
- For more information about adjusting your DVD player or television to display widescreen content (rather than letterbox or "pan and scan"), consult the user guide for those components.

## Document Conventions

This guide uses standard conventions, including:

Convention	Indicates
	Information that is necessary for preventing damage to the software or equipment.
	Important information that you should know when using the software.
	A useful tip or suggestion for getting the most out of the software.
<b>Bold text</b>	A button, menu, command, or other element on the software interface. Also used for examples.

Each topic in this guide begins with information to help you make the best choices while using the software. Step-by-step procedures for specific tasks follow the introductory information.

# Update Savings Plan

It is important to update your reception area program regularly to keep patients engaged and informed of the latest dental procedures and your newest offerings. The content on Smile Channel is revised each year so that patients can enjoy relevant new programs during every visit. The annual update includes exciting new presentations and fresh, eye-catching before-and-after images.

## **Updating Is Convenient and Affordable**

Keep your Smile Channel DVD software current with the latest topics in dentistry by joining our Update Savings Plan. The Update Savings Plan is the easiest and most affordable way to ensure your patient education program remains fresh. Once you join the Update Savings Plan, you will automatically receive the new version as it is released, and you will receive it at a reduced rate.

We offer our Update Savings Plan members 100% Satisfaction Guarantee. If you decide not to keep the update, you can return it within 30 days for a full refund.

To join or renew the Smile Channel Update Savings Plan, contact an Inside Sales Representative at 800-294-8504. For more information, see "Contact Us" on page 25.

## **Updating Is an Exchange Process**

By accepting delivery of Smile Channel DVD 2009, you agree to return your previous version of Smile Channel DVD within 30 days of receiving your new disk. If you do not return the previous version, you will be billed for the retail value of another Smile Channel primary site license.

*Smile Channel is a proprietary product and is protected by copyright laws. There are strict limitations on the transfer of the site license, and previous versions may not be sold under any circumstances.*

# Hardware Requirements

To play Smile Channel DVD 2009, you will need—

- a compatible interactive DVD player with remote control  
OR
- a computer with DVD-ROM drive and compatible MPEG 2 decoder.

## ***Choosing a DVD Player***

While all DVD players will play movies, not all will correctly play complex interactive disks like Smile Channel DVD 2009. For the current list of manufacturers and models that provide the proper playback, please contact us:

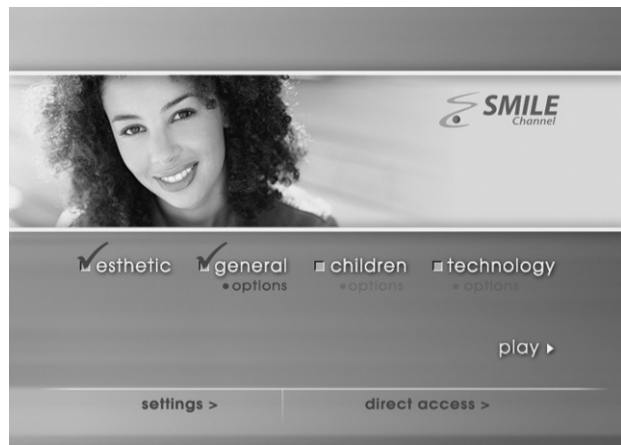

- Contact Customer Support by phone at 800-475-5036 or by e-mail at [ptc.support@pattersondental.com](mailto:ptc.support@pattersondental.com). Assistance is available 8 A.M. to 7 PM, Central Time, Monday–Thursday and 7 A.M. to 6 P.M., Central Time, Friday.
- Visit our Web site at [www.caesy.com](http://www.caesy.com).

## ***Choosing DVD Software for Your Computer***

Most computers provide some sort of software for DVD playback. However, not all will properly play complex (dual-layer) interactive disks like Smile Channel DVD 2009.

# Using Smile Channel DVD 2009

Smile Channel plays automatically in a continuous loop of presentations. However, each time you start Smile Channel, you can control a variety of settings to make the program fit the needs of the practice. You can launch a single presentation, set the loop to play only certain categories of presentations, and set audio and subtitle preferences.

**Smile Channel DVD:** The **main menu** is the starting point to select categories, presentations, and settings. Note: This image shows that the user has chosen the widescreen format.

This chapter shows you how to—

- Start Smile Channel on a computer or DVD player
- Operate the DVD
- Play Smile Channel
- Customize the audio and subtitle options
- Customize the playlist

# Starting Smile Channel DVD

Smile Channel plays automatically in a continuous loop on a computer or a DVD player.

## *Starting Smile Channel on a Computer*

### **To start Smile Channel DVD on a computer—**

- 1 Place the Smile Channel DVD 2009 disk into the DVD-ROM drive.
- 2 If the program does not begin to play automatically, follow the instructions for the DVD playback software program.

## *Starting Smile Channel on a DVD Player*

### **To start Smile Channel DVD on a DVD player—**

- 1 Turn on the television.
- 2 Select the input so you can view the pictures from the DVD player.  
This step depends on how your DVD player is connected to the television.
- 3 Press **Power** on the player or remote to turn on the DVD player.
- 4 Open the player door by pressing the **Open/Close** button.
- 5 Place the Smile Channel DVD 2009 disk into the DVD player.
- 6 Press **Open/Close** to close the tray door and begin playback.

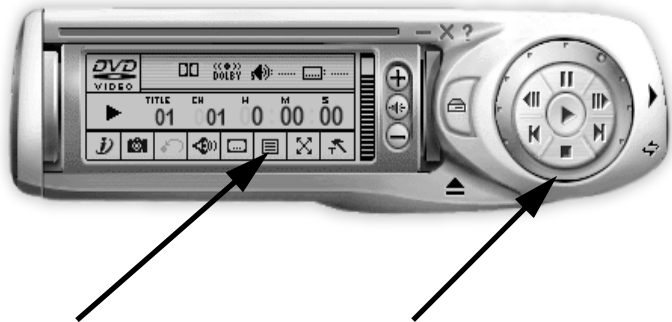

# Operating the DVD

Your computer control or DVD remote may look different than the illustrations below, depending on the make and model of the DVD device for your computer or DVD player. However, the functions are essentially the same, regardless of whether you operate the Smile Channel DVD on a computer or on a DVD player.

## DVD Controls on Computers

You can access the Smile Channel DVD's **main menu** selections (categories, options, settings) with a computer's DVD control by clicking **Menu**. You can also access a specific presentation directly by clicking **Top Menu** or **Title**.

Depending on your DVD software, you can also use many of these functions by right-clicking with your computer mouse. For example, you can right-click to display all available options, and then click **Select Menu** to display Smile Channel DVD menus.

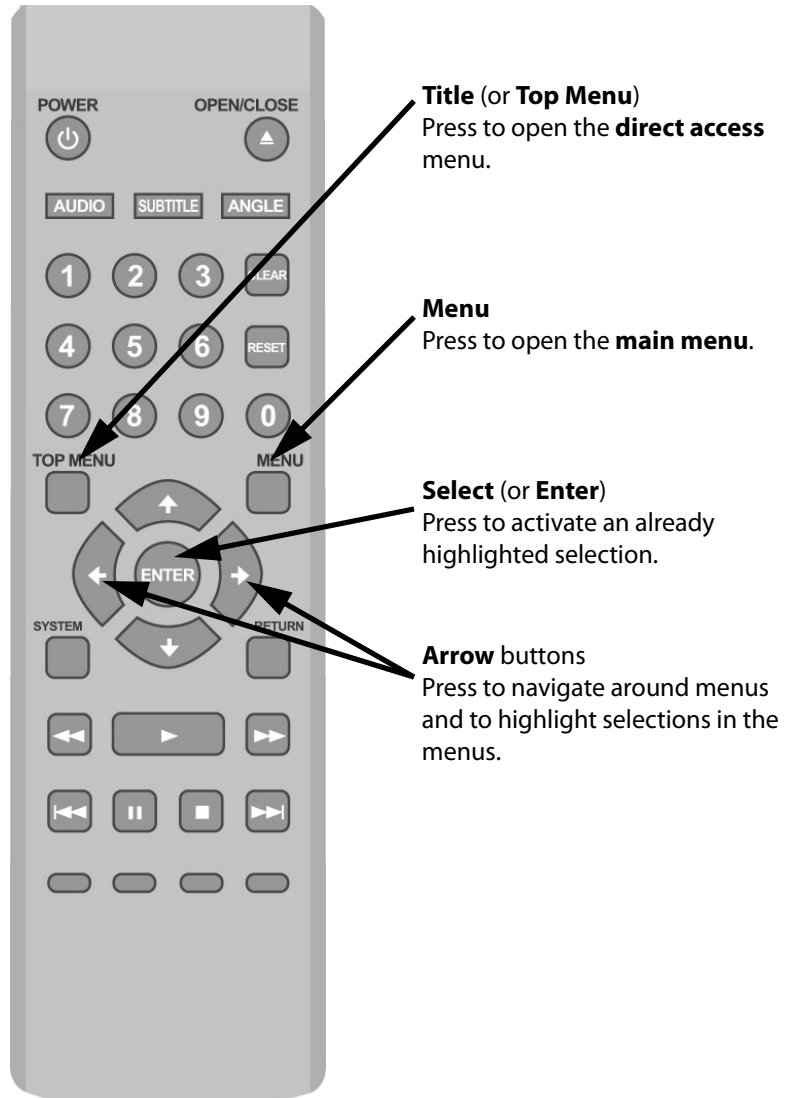

Click **Menu**, and then click **Root Menu** for the Smile Channel DVD's **main menu**, or **Title Menu** for the Smile Channel DVD's **direct access menu**.

Click these buttons to use standard features, such as **Play** (center), **Pause** (top), **Next** (right), **Previous** (left), or **Stop** (bottom).

**Sample control for computer DVD**

## Remotes for DVD Players

You can access the Smile Channel DVD's **main menu** selections (categories, options, settings) with a DVD player's remote device by pressing the **Menu** button. You can also access a specific presentation directly by pressing the **Top Menu** or **Title** button.

*Sample remote for DVD player*

## Smile Channel DVD Quick Reference

Here is a quick reference for playing the Smile Channel DVD. For detailed procedures, refer to the sections in the remainder of this chapter.

### Smile Channel DVD Quick Reference

<b>If you want to...</b>	<b>Select this with your DVD remote or computer control...</b>	<b>And then select this on the Smile Channel DVD:</b>
Display categories of presentations	<b>Menu</b> or <b>Root Menu</b>	<b>main menu</b> display
Enable or disable entire categories of presentations from the playlist	<b>Menu</b> or <b>Root Menu</b>	category's check box
Enable or disable individual presentations within a category	<b>Menu</b> or <b>Root Menu</b>	category's <b>options</b>
Go directly to a specific presentation	<b>Title Menu</b> or <b>Top Menu</b>	<b>direct access</b> / category / presentation
Skip to the next or previous presentation	<b>Next</b> or <b>Previous</b>	
Turn the narration on or off	<b>Menu</b> or <b>Root Menu</b>	<b>main menu</b> / <b>settings</b>
Change the narration language preference	<b>Menu</b> or <b>Root Menu</b>	<b>main menu</b> / <b>settings</b>
Turn the subtitles on or off	<b>Menu</b> or <b>Root Menu</b>	<b>main menu</b> / <b>settings</b>
Stop the presentation briefly	<b>Pause</b>	
Continue playing the DVD	<b>Play</b> or <b>Enter</b>	
Stop playing the DVD	<b>Stop</b>	

# Playing Smile Channel DVD

## *Opening the Main Menu*

You must open the **main menu** to perform many of the procedures described in this guide.

**Opening the Smile Channel DVD:** Select **Menu** or **Root Menu** on your DVD remote or computer control. Or, select **main menu** if you are already in another Smile Channel DVD menu.

## Playing a Specific Presentation

Smile Channel plays in a continuous loop, but you can temporarily interrupt the loop to play a specific presentation at any time.

### To play a specific presentation:

- 1 Open the **direct access** menu in one of two ways:
  - Open the **main menu** and select **direct access**. See “Opening the Main Menu” on page 10 for details.
  - Select the **Title Menu** or **Top Menu** on your computer control or DVD remote.

**Using the direct access menu:** To have a specific presentation play immediately, select a category, and then select the presentation.

- 2 On the **direct access** menu, select a presentation category.
- 3 Review the playlist of presentations in the category menu, and select a presentation.

Some menus have subcategories. To view presentations in these categories, select a subcategory tab at the top of the screen.

After you make your selection, the presentation begins to play. When the presentation ends, the Smile Channel DVD loop continues to play the programmed playlist from that point forward.

If you want to return to the previous presentation and continue the playlist from that point forward, select it through the **direct access** menu.

## *Turning Off the Smile Channel DVD*

You can turn off the Smile Channel loop at any time. When you turn off the Smile Channel, any customized settings are lost. For more information, see and “Creating a Customized Playlist” on page 15.

### **To turn off the Smile Channel DVD—**

- On a DVD player or its remote control, press the **Stop** button.
- On a computer with PowerDVD, click **Stop** on the control panel.

# Customizing the Audio and Subtitle Settings

*Because the DVD format has no memory, customized settings are not saved when you press **Stop**, eject the DVD, or turn off the DVD player. To reprogram, simply follow these steps again the next time you start Smile Channel DVD.*

You can turn on or turn off the audio and subtitle settings for the Smile Channel DVD by using the **settings** option on the **main menu**.

## Setting Audio Options

Smile Channel is preset to play with English language narration. You can change the audio language feature.

**Audio and subtitles settings:** You can access the **settings** options from the **main menu**. Here you can select the audio narration language and subtitles on and off.

### To change audio settings—

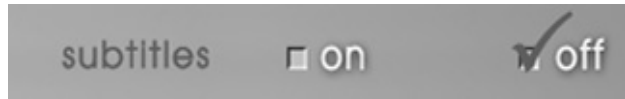

- 1 Begin playing the Smile Channel DVD, or open the **main menu** if the DVD is playing already. See “Opening the Main Menu” on page 10 for details.
- 2 On the **main menu**, select **settings**.
- 3 Select **english** or **spanish** narration.

## Setting Subtitle Options

Subtitles are disabled by default in Smile Channel DVD 2009, but you can change this setting at any time.

### To change subtitle settings—

- 1 Begin playing the Smile Channel DVD, or open the **main menu** if the DVD is playing already. See “Opening the Main Menu” on page 10 for details.
- 2 On the **main menu**, select **settings**.
- 3 In the subtitles section, select **on** or **off** to enable or disable the subtitles. If you are playing Smile Channel DVD from a computer, you can also right-click on the screen and choose the desired language or subtitle option from the pop-up menu.

**Subtitles settings:** A check mark displays next to the selected option. By default, subtitles are off.

# Customizing the Playlist

## Category Options

You can select the categories of presentations you want to play in the Smile Channel DVD loop. You can play one, several, or all categories.

### Smile Channel DVD Categories

Category	Description	Enabled by default?
esthetic	Presentations about esthetic dentistry, such as “Before/After” images, helpful “Did You Know?” information, “Hayley” talk show programs and “Smile Power” facts.	yes
general	Presentations about general dental health and information, such as the “Dentline” news briefs, a “Hayley” talk show program, “Health Watch” and “Science in Dentistry.”	yes
children	Presentations geared toward educating children about basic dental care, entertaining them and helping them to relax. These presentations include the dogs “Buddy and Andy,” “Wally” the seal, “Kirby” the chimpanzee and the “Talk Out Loud” series for ‘tweens and teens.	no
technology	Presentations that explain dental technology, such as air abrasion, CEREC CAD/CAM, DIAGNOdent, digital radiography, intraoral cameras, lasers, microdentistry and power whitening.	no

For a complete list of all Smile Channel presentations, see “Playlist” on page 19.

In addition, some categories provide an **options** menu on the **main menu** so that you can include or exclude certain presentations while keeping the overall category active. This allows you to customize the Smile Channel DVD to fit the needs of your practice.

## Guidelines for Creating a Customized Playlist

Here are some guidelines when choosing presentations for your customized playlist:

*You can still play an individual presentation that is in a disabled category, by using the **direct access** menu. (For more information, refer to “Playing a Specific Presentation on page 11.”) However, it will not play again in the DVD loop unless you specifically select it again.*

- **How many categories can be in my customized playlist?** You can select any or all categories. At least one category should be selected for your playlist. (If you disable all categories, the channel IDs and commercials for the Smile Channel DVD will still play.)
- **How do I put an entire category into my customized playlist?** Simply select the category at the **main menu**. A check mark next to the category indicates that it will be included in your playlist. If there is no check mark next to the category, none of the presentations in the category will play.
- **How do I put individual presentations from a category into my customized playlist?** Select **options** for the desired category, and then select the individual subcategories and presentations as applicable. Be aware that if you remove a category from the playlist (no check mark displays), you cannot select **options** for presentations within the category. If you want only specific, individual presentations within a category to appear in your playlist, you must first select the category (check mark displays).
- **How do I find the options menu?** The **options** menu (to select individual presentations) displays on the **main menu** for the general, children, and technology categories only. You cannot select individual presentation options in the esthetic category.
- **How do I select options for the esthetic category?** The esthetic category is an “all or none” option. By default, all esthetic presentations will be included in the playlist (check mark displays). If you do not want any esthetic presentations to play, clear the category’s check box so that a check mark does not display.

## Creating a Customized Playlist

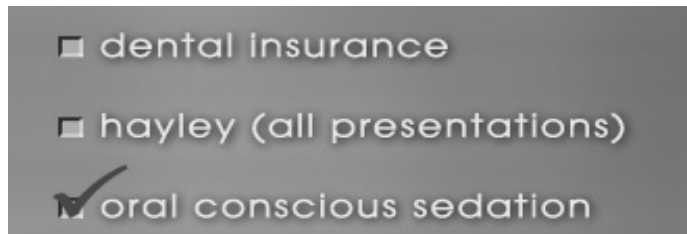

### To choose presentations for your customized playlist:

- 1 Begin playing Smile Channel DVD, or open the **main menu** if the DVD is playing already. See “Opening the Main Menu” on page 10 for details.
- 2 On the **main menu**, select at least one category so that a check mark displays. (To disable a selected category, select it again so that a check mark does not display.)

**Selecting categories:** On the **main menu**, you can select one or more categories for your customized playlist.

- 3 To include or exclude certain presentations for a selected category in the playlist, select the corresponding **options**.
- 4 On the **options** menu, select a presentation to include it in the playlist (check mark displays) or to exclude it (no check mark displays). Repeat as needed.

**Selecting presentations:** Within the category's **options**, you can select presentations for your customized playlist.

- 5 When finished choosing presentation options in each category, select **main menu**.
- 6 When you have finished choosing categories and presentations, select **play** to begin.

# Playlist

This is the playlist order when all categories and presentations are enabled. For your convenience, each presentation in the playlist is identified by category.

C: Children  
 E: Esthetic  
 G: General  
 T: Technology

If you exclude a category or subcategory from your playlist (using **main menu** or **options**), the DVD skips automatically to the presentation in the next available category.
