

What's New in Smile Channel 9?

> Four NEW and four updated presentations

All of Smile Channel 9 is now widescreen!

TECH MINUTE

Introducing "Tech Minute," a new show that traces the evolution of the technology used in operatories today.

Topics include:

- Cone beam 3D imaging
- Lasers
- CEREC CAD/CAM

SMILES FOR THE WHOLE FAMILY

New photos demonstrate how cosmetic dentistry can help every member of the family.

TECHNOLOGIES IN DENTISTRY: MINIMALLY INVASIVE DENTISTRY

The best way to treat a dental problem is to stop it before it starts. This new module on the philosophy and practice of minimally invasive dentistry demonstrates how technology has made dentistry more proactive and saves more teeth.

TECHNOLOGIES IN DENTISTRY: CEREC® CAD/CAM

This module has been updated to show the new CEREC Acquisition Center (AC) powered by Bluecam.

DID YOU KNOW?

It only takes a couple of minutes to give viewers great information that can help improve their smiles and promote esthetic services. Two segments in "Did You Know?" have been updated: All-Porcelain Crowns and Veneers help reinforce the function and beauty of these esthetic services.
